

Public Notice – Environmental Permit

PURPOSE OF NOTICE: To seek public comment on the proposal to utilize an alternate groundwater point of compliance (APC) at the below described solid waste landfill with a permit issued from the Department of Environmental Quality.

PUBLIC COMMENT PERIOD: September 26, 2012 to October 26, 2012

PERMIT NUMBER: SWP 014

FACILITY NAME AND LOCATION: The Mecklenburg County Closed Sanitary Landfill is located on the southeast side of the intersection of state routes 672 and 678, approximately 3 miles east of the town of Boydton, in Mecklenburg County. The landfill is located on the Baskerville, Virginia, USGS 7 ½-minute topographic quadrangle map.

DESCRIPTION: The landfill has requested a variance to locate one or more of its groundwater monitoring wells somewhere other than at the edge of the landfill waste mass as is normally required by the Commonwealth's solid waste regulations. The applicant has demonstrated that moving the location of the monitoring well(s) further from the edge of the waste mass will not result in an unreasonable risk to public health or the environment and will result in a facility design that is equally protective of human health and the environment. If approved, this variance will allow the facility to locate NES-1D and NES-2 400 feet and 300 feet respectively downgradient from the edge of the waste mass, but the wells will remain located on landfill property.

HOW TO COMMENT: DEQ accepts comments by e-mail, fax, or postal mail. All comments must include the name, address and telephone number of the person commenting and be received by DEQ within the 30-day comment period defined above. The public may review all related variance petition documents at the DEQ Regional Office named below.

CONTACT FOR PUBLIC COMMENTS, DOCUMENT REQUESTS, AND ADDITIONAL INFORMATION: Michael Sexton; Groundwater Remediation Specialist, Blue Ridge Regional Office; Phone: (434) 582-6233; Email: michael.sexton@deq.virginia.gov; Fax: (434) 582-5125.
